Kawasaki Heavy Industries, Ltd.
Japan Carbon Frontier Organization

**Construction Completed for CO₂ Separation and Capture Technology
Demonstration Test Facility for Use in Environmental Impact Assessment
with Combustion Exhaust Gases at Coal-fired Power Plant in Wyoming, USA**

On October 9, 2023, Kawasaki Heavy Industries, Ltd. held a ceremony together with Japan C

Supplementary Information

Project Overview

Project Name: Project for the Development of an Integrated Demonstration Facility and Supply Chain for Sustainable Carbon Dioxide Capture, Utilization, and Storage (Demonstration Test for CO₂ Separation and Capture Using a Solid Absorbent) by the Japanese Ministry of the Environment

Project Leader: Japan Carbon Frontier Organization
(project contact point, environmental impact assessment testing)

Joint Implementation Partner: Kawasaki Heavy Industries, Ltd.
(development and provision of the solid absorbent, test facility construction, joint implementation of environmental impact assessment testing)
